MANAGEMENT OF
SEVERE ATROPHY OF THE MAXILLA
AND THE MANDIBLE BY MEANS OF
NON-REGENERATIVE TECHNIQUES

BERGAMO, 30TH-31ST MAY 2019

SPEAKER

DR. MAURO CEREA

Abstract

For the rehabilitation of posterior free-end saddles of the maxilla the
lecturer uses pterygoid implants as an alternative to sinus lift procedures.

These implants exploit the anchorage provided by the pterygoid plates and their
respective pillars of resistance.

As an alternative to inlay/onlay regenerative techniques, a new surgical protocol
involving subperiosteal implants will be proposed. The lecturer will re-introduce a revised, improved and adapted protocol for the
maxillary and mandibular atrophies, according to the anatomy and physiology and
to the newest technological innovations which, in fact, make this protocol extremely
effective and innovative and predictable.

The objectives of the course is to show the detailed anatomy and physiology of the
maxilla and mandible and explain an additional technique to implant rehabilitation
literature which avoids the use of regenerative techniques.

Program

THURSDAY 30TH MAY 2019
14:00 PRESENTATION OF IUXTA-3D METHOD
PART 1
16:00 Coffee Break
16:30 PRESENTATION OF IUXTA-3D METHOD
PART 2
18:00 Question Time

FRIDAY 31ST MAY 2019
09:00 LIVE SURGERY
12:30 Light Lunch
14:00 LIVE SURGERY
16:00 Final remarks

Lectures

Dr. MAURO CEREA

Born in Bergamo on 13/06/1963. In 1987/88 Master degree in
Medicine with full honors and praise at the University of Milan.
From 1991 to 1997 he was doctor manager of the Maxillofacial
Surgery Division in the General Hospital of Bergamo. Winner
of the competition for admission to specializing school in
Maxillofacial Surgery at the University of Milan in 1995/96.
From 1996 to 2006 he covered the position of Medical Director
in Dental and Maxillofacial Surgery-Unit at the San Carlo Clinic
in Paderno Dugnano (Milan) - a clinic was conventioned with
the Public Health National System. Since 1996, he is a freelance
and manager directer of a private dental practice in Bergamo.
In 1996 he also started teaching anatomy and applied surgical
implantology at the Chair of Pathology in Lyon (France) on behalf
of Italian and foreign implant systems-producers. During many
national conferences he performed reports and publications
concerning implantology and Maxillofacial surgery. Since 1990
he is interested in using osseointegration and dental implant
advanced techniques. He uses different kind of implants in
commerce and cooperate with various Italian implant-producers
companies. Ordinary member of the Italian Society of Maxillo-
Facial. Opinion leader of Biotec / Btk since 2009. Trainer-
structor in courses of surgical anatomy on cadavers in Sofia
(Bulgaria) and Verona (Italy).
